

Video Games

Written and Researched by: Patrick Kania

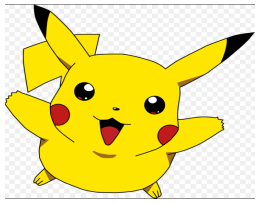

First Video Game

The first Video Game made was in the early 1940-1950's. Also the most popular video game back then was Cathode Ray Tube.

Video Game Research.

Video Games are sometimes helpful sometimes not. They are helpful because they can help on your facts about some things. Also they can help you survive such as the game called Minecraft. Video Games also have a down side. Video Games can also make your hearing worse. Also you can get addicted to games and never want to stop playing them. :)

Video Game Video

Video of the Games

This a video of people and families coming together from playing video games.

Video Game History

The First Station of Video Games was on the computer. Now for 2014 there are 8 generations of games. In 1941-1987 the first video game playing device was a computer. Then a Gameboy 1988. Then the GameCube in 1998.

Then the Wii in 2006. Then the Xbox 360 in 2007. Then the Playstations in 2008-2013 and now the Wii U and Xbox 1 in 2013-2014.

MOST POPULAR GAMES

There are top 5 video games.

1. Titan Fall
2. MW3
3. Black Ops 2
4. Gta IV
5. Minecraft

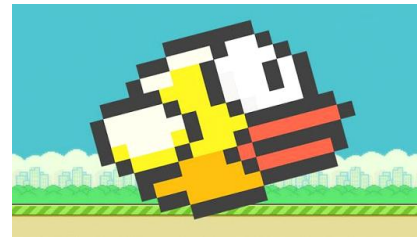

Top 5

I love these games
too!!!!

Least popular Games

1. Flappy Bird
2. Boom Beach
3. Call of duty ghosts
4. Just Dance
5. Pokemon Red City

Least top 5

Website Games

There are also games on Computers such as Roblox and Minecraft. Also you can also use computers for other things such as research, But websites on the computer also help you learn like MobyMax or XtraMath. Video games are also fun on the computer. You can play on the computer if you have internet.

Controls

For Games you need controls such as for Xbox 360 the controls are A-Jump, X-Pick Up, Y-Switch/Inventory, B-Crouch, Rb/Rt-Throw, Back/Start- Pause. Controls are buttons to control a character or animal. They are useful for controlling things.

Thank you!!!!!!!!!!!! :)

I used these websites:

www.Youtube.com

www.Wikepidiea.com

And www.Google.com

HomeWork -> Next slide!!!!

Just Kidding

LOL :)
